Blackhawk Technical College, Janesville, WI – 3.84 GPA

2009 - 2012

### Associate of Arts and Science

University of Wisconsin Rock County, Janesville, WI - 3.49 GPA

## EXPERIENCE

2008 - Present

### Sam's Club

*Electronics Supervisor, Tire Technician*

Have filled many positions in the store including Front-end Supervisor, Over-night Supervisor, Electronics Supervisor. Currently the Senior Tire Technician with duties including inventory management, sales, bids/proposals and installations.

1998 - 2008

### BEST Events Catering

*Rental Manager, General Manager*

Worked my way up, starting as a Dishwasher, then Waitstaff, Event Supervisor, Bartender, Bar Manager, Rental Manager, then General Manager. Some duties included scheduling, subcontracting, design work, bids/proposals, training, web site management and brochure/menu design.

## INTERNSHIPS

2016 - Present

### Waterstone Mortgage – Scott Reid

*Freelance Wordpress Developer*

Perform a variety of functions including updating site content, adding custom events through jQuery, using queue and register WordPress methods to ensure compatibility with other WordPress plug-ins. Work still performed as needed.

2016

### Vanderbloemen Creative

*Web Designer/Developer*

Performed a website update featuring responsive design, a portfolio showcase, and a functional contact page using PHP. Visit the following link to see before and after. Old: vanderbloemencreative.com, New: rpetersen4.btcwsd.com/vbc/.

## RECENT PROJECTS

2012 - Current

### “Hoarding” Terrain Simulator

A completely procedural virtual terrain generator, featuring a infinite randomly-generated voxel terrain complete with random foliage, building creation with structural integrity, and 3D volumetric water. Has over 20,000 lines of working C# code. View my YouTube site link to see progress.

2015 - 2016

### Responsive Website Design

I generated several websites using Twitter Bootstrap, using many of its features to produce responsive websites fit for a phone, tablet or computer. All current examples utilize a combination of Html/CSS, jQuery, and PHP when needed.

2016 - Current

### “Last One Out” Android Game

A 3d game in Java using Libgdx and Bullet physics. It's a vehicular zombie survival game featuring random city generation. You explore the map and evacuate survivors, scoring points based on damage taken and completion time. View my YouTube page for a video, or visit my Github for full Java code.
